REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., November 2, 1891.

SIR: In compliance with the instructions contained in your letter of September 2, 1891, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1891, together with certain additional information relating to the collections made and the work performed during the first three months of the current fiscal year.

The tables contained in the appendix to the bound volume of this report are printed in the following order:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1891.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number and value of certificates of extension of special-tax stamps for May and June, 1891, and the number of the different kinds of certificates of registry; also the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1891.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1891.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1891.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1891.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from July 1, 1863, to June 30, 1891.

Table G, showing the returns of distilled spirits, fermented liquors manufactured tobacco, snuff, cigars, and cigarettes, under the several

acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1891; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1891.

Table H, showing the receipts from special taxes in the several States and Territories for the fourteen months ended June 30, 1891.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1891.

Table K. Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1891.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal year ended June 30, 1891.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the receipts from all sources of internal revenue will aggregate $150,000,000 for the current fiscal year.

In order that the receipts shall reach this figure there will have to be a very considerable increase in the collections from distilled spirits, fermented liquors, and cigars. During the first six months of the current fiscal year there will be a decrease of about $2,500,000 in the tax received from manufactured tobacco and snuff, as compared with the same period of the fiscal year ended June 30, 1890. In my last annual report I estimated that the reduction in the receipts from manufactured tobacco, for the six months ending June 30, 1891, would amount to $2,290,685.17. The actual decrease was as follows:

One hundred and nineteen millions nine hundred and ninety-one thousand seven hundred and fifty-nine pounds of tobacco were tax-paid at 6 cents per pound from January 1, to June 30, 1891, upon which the reduction of 2 cents per pound amounted to $2,399,835.18.

I also estimated that the reduction in the receipts from snuff for the six months would be $92,216.41, but 5,253,008 pounds of snuff were tax-paid at 6 cents per pound from January 1 to June 30, 1891, and the reduction of the tax upon this quantity from 8 to 6 cents per pound resulted in a decrease in the receipts from this source of revenue of $105,060.16.

The aggregate decrease in the receipts from manufactured tobacco and snuff for the six months ended June 30, 1891, was $2,504,895.34.

Taking these figures as a basis, it is probable that the reduction of the tax on manufactured tobacco and snuff from 8 to 6 cents per pound will decrease the receipts from this source about $5,000,000 annually.

I also estimated in my last report that 500,000 gallons of grape brandy, free of tax, would be required to fortify sweet wines, under the provisions of the act of October 1, 1890. The vintage season had commenced, however, before the passage of that act, and the provisions of the law were not fully understood, so that the wine producers did not use as much grape brandy as was anticipated. The actual number of gallons of grape brandy used in the fortification of sweet wines during the fiscal year ended June 30, 1891, was 193,557, the tax upon which, at 90 cents per gallon, would have amounted to $174,201.30.

It is probable that about double the above quantity of grape brandy will be used for the fortification of sweet wines during the current fiscal year.

COLLECTIONS FOR FISCAL YEAR ENDED JUNE 30, 1891.

In my last annual report I estimated that the receipts of this Bureau for the fiscal year ended June 30, 1891, would amount to the sum of $145,000,000. It affords me pleasure to state that the actual receipts for the year named were $146,035,415.97, exceeding my estimate in the sum of $1,035,415.97.

The following statements exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1891, the source from which the revenue was derived, the total sum collected in each district, State, and Territory, the cost of collecting, etc:

NOTE.—The decrease in the receipts from snuff, chewing and smoking tobacco, is due to the reduction of the tax on the same, January 1, 1891, from 8 to 6 cents per pound. Special taxes relating to tobacco were repealed May 1, 1891. The act of October 1, 1890, provides that all special taxes shall become due on the first day of July, 1891, and on the first day of July in each year thereafter, or on commencing any trade or business on which such tax is imposed. The effect of this provision was to postpone the collection of the bulk of special taxes from May and June, 1891, to July and August, 1891, or from the last quarter of the fiscal year 1891 to the first quarter of the fiscal year 1892. Hence the apparent decrease in the receipts from special taxes relating to distilled spirits, fermented liquors, and oleomargarine as compared with the receipts from the same sources for 1890.

WITHDRAWALS FOR CONSUMPTION DURING THE LAST TWO FISCAL YEARS.

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine	$1,761,157.70
For salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses	2,103,451.58
For paper for internal-revenue stamps	45,575.90
For expenses of detecting and punishing violations of internal-revenue laws	35,762.15
For salaries of officers, clerks, and employés in the office of Commissioner of Internal Revenue	259,708.16
Total	4,205,655.49
In addition to the foregoing there was also paid from a specific appropriation made for this purpose, for expenses incident to carrying into effect the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, the sum of	4,948.67
Making the total amount expended	4,210,604.16

The percentage of the cost of collection is 2.88 per cent.

The expenses for the previous fiscal year were $4,095,110.80, being 2.82 per cent. of the collections.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was $2,100,000, while, owing to the increased number of distilleries in operation resulting, in an increase in the amount of taxes collected from spirits of more than $3,000,000, as compared with the previous year, as shown in this report, the actual expenses for this purpose were $3,451.58 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

In the above statement of cost of collection there is included a very considerable amount of money expended in the preparation of the regulations, and other expenses incident to the enforcement of the law in relation to the payment of the bounty on sugar.

These items are so connected with the other expenditures of this Bureau as to render it impracticable to separate them. In addition to this, there were gauged 193,557 gallons of grape brandy used in the fortification of sweet wines upon which no tax was paid, and a number of deputy collectors and other officers were necessarily employed in supervising the delivery of this brandy to the wine-makers. These sums should properly be deducted from the cost of collection, and it they could be separated the percentage of cost of collection for the fiscal year ended June 30, 1891, would be very materially reduced.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public moneys forwarded by collectors and deputy collectors to the depositories	$4,272.20
Locks for use at distilleries	5,915.86
Hydrometers used in gauging spirits	11,296.75
Gauging rods and wine measures	241.35

Steel letters for numbering stills	$37.50
Saccharometers, polariscopes, and chemicals for testing sweet-wine samples	999.08
Stationery for internal-revenue officers	15,914.12
The Internal Revenue Record supplied to internal-revenue offices	2,399.96
The Federal Reporter for the office of the Commissioner of Internal Revenue	10.00
Compensation of United States attorneys in internal-revenue cases allowed under sections 827 and 838 Revised Statutes	776.22
Traveling expenses of clerks under special orders of the Department	530.38
Expenses of seizures and sales by collectors	498.65
Total	42,892.07

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal Revenue Service for the fiscal year ending June 30, 1893, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco exported, and the act of October 1, 1890, providing for payment of a bounty on sugar, including miscellaneous expenses incident to ascertaining and paying said bounty	$1,950,000
For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for miscellaneous expenses	2,150,000
For salaries and expenses of sugar inspectors	40,000
For paper for internal-revenue stamps	60,000
For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information and detection	50,000
For salaries of officers, clerks, and employés in the office of the Commissioner of Internal Revenue	272,580
Total	4,522,580

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1893, the sum of $272,980 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	$6,000
One deputy commissioner, at	3,600
One chemist, at	2,500
One microscopist, at	2,500
Two heads of division, at	2,500
Six heads of division, at	2,250
One superintendent of stamp vault, at	2,000
One stenographer, at	1,800
Twenty-five clerks, at	1,800
Twenty-five clerks, at	1,600
Thirty-five clerks, at	1,400
Twenty-five clerks, at	1,200
Fourteen clerks, at	1,000
Forty clerks, at	900
Three messengers, at	840
Fourteen assistant messengers, at	720
Thirteen laborers, at	660

An aggregate of 208 persons.

I also recommend the appropriation of the sum of $2,500 as salaries for one stamp agent at $1,600 and one counter at $900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

At the close of the year ended June 30, 1891, 201 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was $259,708.16.

I take great pleasure in bearing witness to the fidelity, diligence, and accuracy of the officers, clerks, and employés of this Bureau during the past fiscal year. The work of the office is in a most excellent condition, and as fully up to date as practicable, and all business has been promptly and accurately transacted.

The examinations of the offices of collectors, which have been had as often as it was possible with the force of revenue agents at my command, show them to be generally in good condition. It is on account of the promptness, industry, and efficiency of the collectors and their subordinates to a large degree that the collections during the past fiscal year were so largely increased, and by their diligence and economy that the expense of collection was reduced.

In addition to the regular work of the Bureau the officers and clerks in this office have examined 29,427 claims for the payment of rebate on tobacco, etc., arising under the provisions of the act of October 1, 1890. Many of these claims involved considerable sums of money, and their examination and verification required a large amount of extra work, which was distributed among the different divisions of the office and performed with fidelity and dispatch. For several months prior to the close of the fiscal year three clerks were kept constantly employed in the work preparatory for the payment of a bounty on sugar, as provided for by the act of October 1, 1890. The use of grape brandy for the fortification of sweet wines has also added largely to the clerical work of the office. In considering the entire work performed by the force in this office I regard their year's labor as most praiseworthy indeed.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
$25,000 or less	$2,000	$375,001 to $425,000	$3,375
25,001 to $37,500	2,125	425,001 to 475,000	3,500
37,501 to 50,000	2,250	475,001 to 550,000	3,625
50,001 to 75,000	2,375	550,001 to 625,000	3,750
75,001 to 100,000	2,500	625,001 to 700,000	3,875
100,001 to 125,000	2,625	700,001 to 775,000	4,000
125,001 to 175,000	2,750	775,001 to 850,000	4,125

STOREKEEPERS, GAUGERS, ETC.

There were also employed 622 gaugers, who received fees not to exceed $5 per day; 570 storekeepers, and 1,204 storekeepers and gaugers, whose pay did not exceed $4 per diem, and 4 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compen-

sation as may be prescribed by the Commissioner of Internal Revenue, not to exceed $4 per day.

The pay of storekeepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at $2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeepers and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, $3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, $3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, $4 per day.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, ten in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and six in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	$43,024.00
Aggregate amount of traveling expenses	29,322.43
Stationery furnished agents	209.76
Transportation over Pacific railroads	380.94
Total	72,937.13

WORK OF REVENUE AGENTS.

One thousand six hundred and thirty-seven violations of internal-revenue law have been reported by revenue agents during the year; 744 persons have been arrested on their information; property to the value of $215,003.85 has been reported by them for seizure, and $111,324.48 for assessment for unpaid taxes and penalties.

MANUFACTURE OF STAMP PAPER.

On the 25th day of March, 1891, sealed proposals were invited from manufacturers for supplying paper of prescribed quality and finish to be used in the printing of internal-revenue stamps for the present fiscal year. But one bid was received, that of the Fairchild Paper Company, of Boston, Mass. The committee appointed by the Secretary of the Treasury to consider the bids met at 12 o'clock m. on the 4th day of May, 1891, and in presence of a representative of the Fairchild Paper Company opened the bid, and after consultation decided to recommend its acceptance. The rate at which the company proposed to manufacture the paper was 6.1 cents per pound, a reduction of 0.2 cent per pound from last year's contract price. The contract was awarded to the Fairchild Paper Company under date of June 8, 1891, and the work thereunder was begun July 13, following. It is estimated that not less than 700,000 pounds of paper will be required under the present contract in order that a six months' stock may be assured at the close of operations.

STAMP PRODUCTION.

The Bureau of Engraving and Printing supplies all internal-revenue stamps required by law, with the exception of those imprinted on tin-foil wrappers for certain manufactures of tobacco. These last are fur-

nished by the John J. Crooke Company, of New York, under contract, without cost to the Government, the contractor being compensated by the manufacturers. Under the terms of the contract the Crooke Company reimburses the Government in full for the aggregate salaries paid one United States stamp agent and one counter, amounting to $2,500 per year. These salaries are reimbursed monthly.

CLAIMS FOR REDEMPTION BARRED BY STATUTE.

One hundred and forty-eight applications and inquiries for redemption of check and proprietary stamps were received during the year. These claims varied in amounts from a few cents to $32. Being barred by statute, the claims were rejected and the stamps returned to claimants. The seventy-eight claims noted in previous reports as being made up without sufficient data are not yet disposed of. I would suggest the adoption of some measure for final disposition of these cases, in order that they may be omitted from subsequent reports. They were never in proper condition for adjudication, since some were made up without claims to accompany stamps and some without stamps to accompany claims, and in neither case could claimants be identified.

OFFICIAL COUNT OF STAMPS IN VAULT.

December 22, 1890, a committee of three, representing the Secretary's Office, the Comptroller's Office, and the Bureau of Engraving and Printing, respectively, was appointed to superintend the counting of the internal-revenue stamps in the vaults of this Bureau. The vaults were placed in charge of the committee on the morning of December 29 following, when the count began, a special force of counters and laborers having been designated for the purpose. Statements showing by classes and denominations the balances of stamps on hand December 26, 1889, the receipts and deliveries thereafter and the balances on hand December 29, 1890, were furnished by the Division of Loans and Currency, Secretary's Office, and the count of stamps, which closed on the evening of December 31, was found to agree in every respect therewith, and showed that all the stamps with which the Commissioner was charged were properly accounted for. The summary given by the committee shows that there were on hand December 26, 1889 (the date of previous count), 78,865,617 stamps of all denominations. There were received from the Bureau of Engraving and Printing and from collectors for reissue, during the period from December 26, 1889, to December 29, 1890, 820,138,024 stamps, making a total to be accounted for of 899,003,641 stamps. There were delivered for issue, reissue, and destruction, during the same period, 876,066,300 stamps, leaving a balance to be accounted for December 29, 1890, of 22,937,341 stamps, which, by actual count, were found to be in the vaults on that date. The decrease in the balance on hand, as compared with the previous annual count, is accounted for in the fact that the issues of all denominations of stamps during the period mentioned was, in about the degree of the difference noted, in excess of the receipts from the Bureau of Engraving and Printing.

The committee in charge of the vaults carefully verified the accounts of the bookkeepers of the division, and found that they agreed in all respects with those of the Secretary's office.

The fact that nearly one billion of stamps were received and issued by the Office of Internal Revenue without loss during the past year

was noted by the committee as indicating "the highest efficiency and integrity on the part of the officers charged with the responsible duty, and that the system by which this result has been accomplished is well calculated to protect the interests of the Government in this important branch of the service."

ACT OF OCTOBER 1, 1890.

Under the provisions of the act of Congress approved October 1, 1890, the special-tax year was made to begin with the fiscal year, the law to take effect July 1, 1891. Provision was therefore made for the extension of all special-tax stamps issued May 1, 1890, and thereafter of that series, to cover the business of purchasers for the months of May and June, 1891, by the issuance of certificates of extension, numbered in regular sequence and describing in each, by serial number and otherwise, the particular stamp, for extension of which it was issued. By reference to tabular statement of stamps issued it will be seen that there were sent to collectors during the period from April 10 to June 30, 1891, 222,538 of these certificates, aggregating in value $1,131,740.

Under the same act the special taxes heretofore imposed upon dealers in manufactured tobacco, dealers in leaf tobacco, retail dealers in leaf tobacco, manufacturers of tobacco, manufacturers of cigars, and peddlers of tobacco were abolished, with the provision that all such manufacturers and dealers, with the exception of dealers in manufactured tobacco, should register with the collectors their names, places of business, etc., the same as though the tax had not been repealed, prescribing a penalty of $50 for neglect or refusal to comply with the requirement. For the protection of those who might desire to register in either of the occupations enumerated, certificates of registry were provided for issue through the collectors, in the same manner as special-tax stamps are issued, to all applicants regularly registered. There were 61,160 of all classes of these certificates issued to collectors prior to June 30, of the present year, many of these having been consumed for the registry of dealers for the period of two months ending June 30.

The foregoing certificates, as well as the certificates of extension, were furnished by the Government Printing Office.

The reduction of 2 cents per pound in the tax on tobacco necessitated the return to the office by collectors of all the stamps of the series of 1883 in their hands at the close of business December 31, 1890, and their reissue at the rate of 6 cents per pound. To accomplish this, all these stamps were received into vault, and the sheet and strip stamps, together with those of same class and denomination in stock, were forwarded to the Bureau of Engraving and Printing and were there properly imprinted. The coupon stamps returned and those in stock were imprinted by the use of hand stamps under the supervision of a special committee appointed for that purpose by the Secretary of the Treasury.

It is proper to say that the increased labor imposed by this reduction in the tax, and by the introduction of the certificates of extension, the certificates of registry, and a stamp with two coupons for issue to special-tax payers who began business in May and June, 1891, was accomplished successfully, and the accounts accurately kept, without a moment's delay in the current work and without additions to the clerical force.

There have been added to the stock of stamps regularly kept in vault since July 1, 1890, the following new classes and denominations: (*a*) Fortified sweet wine; (*b*) fortified wine for exportation; (*c*) transfer

stamp for grape brandy; (*d*) export stamp for fermented liquors; (*e*) 12s cigar stamps; (*f*) 13s cigar stamps; (*g*) cigarette stamps, rate $3 per thousand; (*h*) stamps for prepared smoking opium; also, certificates of registry. In addition, for use this year only, were the special-tax stamps with two coupons for issue to purchasers who desired to begin business in May and June, and the certificates of extension, both being mentioned elsewhere in this report.

STAMPS DESTROYED IN TRANSIT.

On the 28th day of April, 1891, a wreck occurred on the Baltimore and Ohio Railroad, which involved the total destruction of internal-revenue stamps, in transit by registered mail, of the face value of $29,-505. The stamps consisted of tax-paid spirits stamps of the denomination of 100 gallons, value $29,430, and 20,000 one-ounce tobacco stamps, value $75, all mailed to Collector Wilcox, of the eighth Illinois district. In addition, there were destroyed two books of 200 stamps each of rectifiers' stamps, denomination 40 gallons (of no face value), shipped to Collector McDowell, of the seventh Kentucky district. The destruction of the stamps necessitated a second requisition by the collectors, and the destroyed stamps stand charged to the Commissioner of Internal Revenue, and are unaccounted for in the accounts of the Bureau.

There is no provision of law authorizing the accounting officers of the Treasury Department to credit the accounts of the Commissioner of Internal Revenue with stamps destroyed under such circumstances, and it will be necessary for Congress to pass a special act authorizing the accounting officers to give credit for this loss. I therefore have the honor to ask that you will recommend the necessary legislation on the part of Congress to obtain such credit.

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was $32,796,270.97. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The decrease of collections for the last fiscal year as compared with those for the previous fiscal year was $1,162,720.09. This is due to the reduction by the act of October 1, 1890, of the tax on snuff, chewing and smoking tobacco, January 1, 1891, from 8 to 6 cents per pound, and to the repeal of special taxes relating to tobacco, May 1, 1891.

The tax on cigars and cigarettes was not changed, and the collections therefrom were increased $1,386,650.39 during the last fiscal year.

	Increase.	Decrease.
Cigars and cheroots	$1,161,008.35	
Cigarettes	225,642.04	
Total	1,386,650.39	
Tobacco		$1,244,848.69
Snuff		11,575.88
Special taxes		1,292,945.91
Total decrease of collections, tobacco and snuff		2,549,370.48
Deduct increase of collections, cigars and cigarettes		1,386,650.39
Net decrease of collections		1,162,720.09

The increase in the quantity of tobacco and snuff and in the number of cigars and cigarettes for the last fiscal year over those taxed the previous fiscal year was:

Special-tax payers previous special-tax year	632,229
Increase during special-tax year 1891	7,879

The act of October 1, 1890, abolishing all special taxes upon the foregoing, went into effect May 1, 1891, and in lieu thereof requires registry, (except in the cases of dealers in manufactured tobacco, 611,411 persons who are exempted.) No reports are on file at present showing number of manufacturers, peddlers, dealers, and retail dealers who have so registered.

DISCONTINUING THE USE OF CAUTION LABELS.

I beg to recommend that sections 3364 and 3393 of the Revised Statutes be repealed.

Section 3364 requires every manufacturer of tobacco or snuff, in addition to all other requirements of law relating to tobacco, to print on each package, or securely affix by pasting on each package containing tobacco or snuff manufactured by him or for him, a label on which shall be printed the number of the factory, the district, and State in which it is situated, and these words:

NOTICE. The manufacturer of this tobacco has complied with all the requirements of law. Every person is cautioned under the penalties of law not to use this package for tobacco again.

Every manufacturer of tobacco who neglects to print on or affix such label to every package containing tobacco made by him or for him, or sold or offered for sale by him, and every person who removes any such label so affixed from any such package shall be fined $50 for each package.

Section 3393 provides that every manufacturer of cigars shall securely affix by pasting on each box containing cigars manufactured by him or for him a label, on which shall be printed, besides the number of the factory, and district, and State, in which it is situated, these words:

NOTICE. The manufacturer of the cigars herein contained has complied with all the requirements of law. Every person is cautioned not to use either this box for cigars again or the stamp thereon again, nor to remove the contents of this box without destroying said stamp, under the penalties provided by law in such cases.

The penalty for violation of this section is $50 for each box.

It will be observed that these notices are required to be given by the manufacturers of tobacco, snuff, and cigars. They are required to declare that they have complied with all the requirements of law and also to state what the law is as to the re-use of packages and stamps, and to caution the public against the re-use of the package or stamp or the removal of the contents without destroying the stamp. If it were thought necessary that a caution of this kind should be given the public, and that notice should be given declaring that the manufacturer had complied with law, it is submitted that that notice and caution should be given by the proper revenue officer. Neither of these sections imposes any penalty except one for failing to give the notice and for removing same. Whatever may have been the necessity for giving public notice of any of the provisions of internal-revenue law at the time that the internal-revenue law was enacted, there seems to be no further reason for it, the system having been in existence for many years.

In addition to that, I am of the opinion that the caution notice is placed upon packages in such a manner that but few people read it.

I am clearly of the opinion that both of these sections are wholly unnecessary; that they require manufacturers to incur needless expense, and add to the petty penalties with which the system is overburdened.

THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed through the different States, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and the quantity and kind of products manufactured. These tables are

compiled from the reports received from collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1890, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

There were in New York City thirty-six persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by cigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack and sell their product as smoking tobacco. During the year 1890 they purchased 1,455,378 pounds of such material and exported and sold 1,388,060 pounds. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption.

SMOKING OPIUM.

Under the act of October 1, 1890, section 36, a tax of $10 per pound was levied upon all opium manufactured in the United States for smoking purposes.

Proper regulations, blanks, forms, records, bonds, stamps, etc., have been prepared in accordance with the terms of said act, but no persons qualified as manufacturers of opium during the fiscal year, and except the issuing by this office of proper stamps, records, blanks, etc., to the collector of the first district of California, there is at present nothing to report in connection with the legitimate manufacture of opium in the United States under the provisions of said act.

In order to make this law effective several amendments will be required, among which one forfeiting illicit factories, and also duly authorized factories where there is any serious violation of the law. It should also be made a penal offense to remove stamps, to re-use stamps, or to have in possession stamps that have once been used. In addition to this, I would suggest that Congress be requested to further amend the act by requiring all dealers in crude opium to keep such books and to make such returns as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may direct.

DIRECT TAX.

A few claims for the surplus proceeds of the sale of land under the direct-tax laws (section 36 of the act of August 5, 1861) have been allowed during the past year, amounting to the sum of $643.47.

Of the amount appropriated by the act of March 3, 1883, for the payment of these claims, there remained at the commencement of this fiscal year the sum of $126,172.31 available.

All the applications for redemption of school farm lands, under the provisions of the act of March 3, 1887, as amended, have been acted upon.

Total number of releases, 28; total number of acres redeemed, 3,446½; number of acres unredeemed, 6½.

ABATEMENT CLAIMS.

On the 1st of July, 1890, there were pending 74 claims for abatement of assessed taxes, amounting to $13,674.32, and during the year 3,866

claims amounting to $2,840,252.23 were presented. Of these, 1,967 claims, amounting to $1,519,363.73, have been allowed by this office, and 476 claims, amounting to $1,063,883.26, have been rejected or returned for amendment. This left 1,497 claims for abatement still pending on the 30th of June, 1891, amounting to $270,679.56.

Since that date and up to October 1, 548 other claims have been filed, amounting to $172,289.45; 1,302 claims have been allowed, amounting to $259,078.29, and 249 rejected or returned for amendment, amounting to $25,911.16, and on the 1st of October, 1891, 494 claims for abatement were pending, amounting to $157,979.56.

REFUNDING CLAIMS.

On the 1st of July, 1890, there were pending 82 claims for the refunding of taxes collected, amounting to $129,634.72, and during the year 308 other claims, amounting to $124,041.02, were presented, and 2 rejected claims, amounting to $27,698.32, were reconsidered.

Of these, 190 claims, amounting to $105,475.50, have been allowed, and 62 claims, amounting to $42,914.54, have been rejected or returned for amendment. This left 140 claims for refunding still pending on the 30th of June, 1891, amounting to $132,984.02.

Since that date and up to the 1st of October, 1891, 47 other claims have been received, amounting to $2,572.81. Of these, 42 claims have been allowed, amounting to $1,632.80, and 8 have been rejected or returned for amendment, amounting to $1,851.82, and on the 1st of October, 1891, 137 claims for refunding were pending, amounting to $132,062.21.

REBATE CLAIMS.

The following statement shows the number and amount of claims presented for rebate of taxes on tobacco and snuff, under the provisions of the act of December 15, 1890, and the disposition of the same:

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1891, was 1,618, of which number 1,424 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1890, were 1,536 and 1,397, respectively, showing an increase during the last fiscal year of 82 in the number registered and of 27 in the number operated.

The larger portion of the increase in the number registered and the whole of the increase in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 70 in the number of distilleries of this class registered and an increase of 29 in the number operated.

In the class of larger distilleries there was an increase of 12 in the number registered, but a decrease of 2 in the number operated.

During the fiscal year ended June 30, 1890, there were registered 1,308 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,170, or 89 + per cent., were operated.

Of the larger distilleries having daily grain capacities varying from 60 to several thousand bushels each, 228 were registered and 227, or 99½ per cent., were operated.

During the fiscal year ended June 30, 1891, of the smaller distilleries 1,378 were registered, and 1,199 or 87+ per cent. were operated.

Of the larger distilleries 240 were registered, and 225 or 93+per cent. were operated.

There were 11 rum distilleries registered and 11 operated, an increase of one over the number reported for the previous fiscal year.

There were 2,420 fruit distilleries registered and 2,384 operated; a decrease of 2,464 in the number registered and of 2,420 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered and operated during the year is 4,049 and 3,819, respectively.

There was a decrease of 2,381 in the number of all kinds of distilleries registered and a decrease of 2,392 in the number of all kinds operated during the fiscal year ended June 30, 1891, as compared with the fiscal year ended June 30, 1890.

The average yield per bushel of grain was $\frac{114,178,077}{*26,385,401} = 4.32 +$ gallons of spirits.

The average yield per gallon of molasses was $\frac{1,784,312}{*2,368,171} = .753 +$ gallons of rum.

*242,747 gallons of molasses were used in combination with grain for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

The quantity of grain used in the production of spirits during the fiscal year ended June 30, 1891 (26,347,641 bushels) is an increase of 1,144,740 bushels over the amount used in the preceding fiscal year (25,202,901 bushels) and is 5,476,048 bushels more than the average (20,871,593 bushels) for the last ten years.

The number of gallons of spirits produced from grain during the year (114,178,077 gallons) shows an increase of 6,559,957 gallons over the product (107,618,120 gallons) of the year ended June 30, 1890, and is 28,624,713 gallons more than the average produced (85,553,364 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.32+ gallons. The yield for the two preceding years was 4.18+ for 1889 and 4.27+ for 1890.

The quantity of molasses used for the production of rum during the fiscal year (2,368,171 gallons) shows an increase of 169,633 gallons over the quantity used in the previous year (2,198,538 gallons) and is 43,363 gallons more than the average (2,324,808 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,784,312 gallons) shows an increase of 126,504 gallons over the product of the previous year (1,657,808 gallons) and is 8,316 gallons more than the average product (1,775,996 gallons) for the last ten years.

SPIRITS GAUGED IN 1891.

STATEMENT SHOWING THE QUANTITIES, IN TAXABLE GALLONS, OF DISTILLED SPIRITS GAUGED DURING THE FISCAL YEAR ENDED JUNE 30, 1891, BY COLLECTION DISTRICTS.

Collection districts.	Distilled spirits other than apple, peach, and grape brandies—							Apple, peach, and grape brandies produced, and withdrawn from special-bonded warehouses, tax-paid, for export, and use of United States.	Total gauged.
	Deposited in warehouse.	Withdrawn from warehouse—				Dumped for rectification.	Rectified.		
		On payment of the tax.	For export.	For scientific purposes and use of the United States.	For transfer to manufacturing warehouses.

WEIGHING DISTILLED SPIRITS.

The expediency of ascertaining the quantity of distilled spirits subject to tax, by means of weighing, has engaged my attention during the past year, and I have caused a number of experiments to be made, some of which I have personally supervised, to test the relative merits of weighing, and of gauging, as methods of finding the true quantities, and to determine the practicability of the former for use under the internal-revenue system.

The defects of gauging as an exact measure of the contents of packages have long been apparent, and have occasioned many difficulties in obtaining the full and correct amounts of tax due, and in guarding against intentional evasions of liability. Gauging is at best but an approximate way of finding the holding contents of a perfect cask, made upon true lines, and of material of an even thickness. When the curves of the cask differ from those upon which the mathematics of gauging are based, or its staves or heads are not of a uniform and established thickness, then gauging is further at fault and its results still more unreliable. Even when the capacity of a cask has been found with reasonable correctness, there still remains another measurement to be made to determine the portion of that capacity not occupied by spirits, if the package be not full, as for reasons of expansion it can not well be; and when the apparent volume of spirits has thus been found, a calculation must still be made to find the true volume at a temperature of 60° F., whenever the spirits are gauged at any other temperature. These several steps must be taken to obtain the wine gallons upon which the proof gallons are to be still further calculated.

Besides the liability to error in any one or in all of these processes, there is necessitated, in order to avoid delay, a constant dropping of fractions, or taking of the next higher gallon, which, in theory, offset each other, but in practice are usually against a true result.

Moreover, the performance of these various operations is a lengthy one, requiring a considerable time to insure the degree of accuracy obtainable, and thus compelling the employment of a large number of officers to discharge the duties with the promptness which the business demands.

By the system of weighing, on the other hand, the scales record quickly and with unfailing accuracy the gross weight of spirits and of containing cask; and the ascertained empty weight of the cask being deducted, the precise number of pounds weight of the spirit contents remains.

After taking the proof, or alcoholic strength, of the spirits, the exact equivalent, in wine gallons, of the pounds weight is obtainable by applying thereto the factor arising from the known weight of a gallon of water and the specific gravity of spirits of the ascertained proof.

This calculation is easily tabulated for ready use for any number of pounds of spirits of any degree of proof.

From the wine gallons so found the proof gallons follow by the simple application of the proof thereto.

This method of finding the true volume of spirits avoids all difficulties arising from the shape or dimensions of packages, or from their ullage or wantage, as well as from variations in the bulk of spirits due to temperature, and appears to be superior to the present method of gauging in every feature of facility, convenience, and accuracy.

It can be readily acquired, calling for little skill beyond the ability to read the scales and to ascertain proof correctly. It seems probable

that it will so far facilitate the labors of gaugers as to materially lessen the number of officers of this class necessary for the performance of their duties.

As to the entire practicability of substituting weighing for gauging I have taken the opinion of a large number of men experienced in the production or handling of distilled spirits, and the predominating expression on the part of intelligent persons who have given any thought to this matter is distinctly in its favor.

In view of these considerations, I have decided, after consultation with yourself and with your approval, and under the authority conferred upon me by section 3249 of the United States Revised Statutes, to prescribe the use of the scales in place of the gauge rod at distilleries and, so far as applicable, at rectifying houses; retaining the rod for use in gauging packages of rectified spirits whose true proof is not ascertainable owing to the presence of saccharine or other matter in the spirits; and under other circumstances when the use of the scales may not be feasible.

For this purpose I have had tables prepared in this office for use, as above indicated, in connection with the scales, and for the ascertainment of the proof gallons as well as the wine gallons, and I am now preparing regulations to establish the new system.

I have also, with your approval, contracted with the Fairbanks Company, which upon advertisement was the only bidder, to furnish at the expense of the United States twenty-three hundred scales or weighing beams, with poises and barrel hooks—a sufficient number, I judge, for the present, and perhaps for a considerable period.

The cost of these scales, at $10 each, with the appurtenances, will, I am confident, be much more than compensated within no great space of time by a reduction in the expense of gaugers' fees, relative to the number of gallons gauged, and, besides, by a large addition to the amount of tax collected, due to greater accuracy, although such addition can not perhaps be definitely estimated.

DISPENSING WITH GAUGING SPIRITS OUT FROM RECTIFYING HOUSES.

Section 3320 of the Revised Statutes requires that "Whenever any cask or package of rectified spirits containing five wine-gallons or more is filled for shipment, sale, or delivery, on the premises of any rectifier who has paid the special tax required by law, it shall be the duty of the United States gauger to gauge and inspect the same, and to place thereon an engraved stamp, signed by the collector of the district and the said gauger, which shall state the date when affixed, and the number of proof-gallons," etc. When this stamp is attached the package is placed upon the market. The stamp is, of course, expected to show the proof of the contents of the package, but inasmuch as rectified spirits are very frequently compounded by the addition of saccharine substances it is impossible to accurately determine the proof thereof. The proof of spirits is obtained by the use of a hydrometer, but where any substance is mingled with the spirits which has a greater specific gravity than water and alcohol, the hydrometer will not register the proof. In all such cases the gauger is compelled to take the statement of the rectifier as to the strength of the spirits. When spirits are entered into a rectifying house and dumped they are gauged before any rectification takes place. Such spirits have also been gauged at least once before at the distillery, and as the surveillance exercised by the Government over rectifying houses is simply to prevent frauds (there being no additional tax on rectified

spirits), it is, in my opinion, unnecessary to attempt to regauge spirits after they have passed through a rectifying house.

First, because I think it is unnecessary as a protection against fraud; and, secondly, because whenever any saccharine matter has been added to the spirits it is impossible to ascertain their proof. During the past fiscal year 71,220,931 gallons of rectified spirits were gauged, involving a large amount of work, which cost the Government a very large sum of money. I am of the opinion that the interests of the service do not require this expenditure, and therefore suggest that Congress be asked to make the necessary amendments to the law dispensing with the gauging of spirits out from rectifying houses, and providing in lieu thereof that the rectifier be required to report to the collector of internal revenue the number of gallons so rectified and the proof thereof, and to place a stamp upon the package showing the serial number of the package from which it was taken, the manufacturer thereof, and such other facts as shall be required by the Commissioner of Internal Revenue, with your approval, and imposing a fine for a failure to make such report or affix such stamp. Of the Revised Statutes, sections 3317 and 3318 would be indirectly affected, and sections 3320 and 3323 directly affected by such amendments.

By substituting the system of weighing for the present system of gauging for the purpose of ascertaining the contents of a package of distilled spirits, and by dispensing with regauging out of rectifying houses, it is believed that the expenses of gauging will be reduced to the minimum.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1891; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy tax-free in fortifying wines; to the act of October 12, 1888, entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," and to the act of March 3, 1891, authorizing the use of alcohol tax-free in the manufacture of sugar from sorghum, are prepared from reports in the Division of Assessments. Reports relative to the operation of the oleomargarine law, which were received during the first half of the fiscal year, were transferred to the Division of Revenue Agents January 1, 1891. The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 82 (see also special index on page 81); to operations in special bonded warehouses on page 169; to exportations in bond free of tax as to spirits on page 142; as to fermented liquors on page 180; as to tobacco, snuff, cigars, and cigarettes on page 177; to exportations with benefit of drawback on page 179; and to the use of brandy in fortifying wines on page 175. No case has yet arisen under the act of March 3, 1891, above referred to, and since my last report only one under the act of October 12, 1888.

ASSESSMENTS.

1. By States and Territories, 1891.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1891:

States and Territories.	Amount.	States and Territories.	Amount.
Alabama	$6,296.53	Montana, Idaho, and Utah	$1,273.62

TABLE SHOWING THE SERIAL NUMBER, NAME OR NAMES OF THE DISTILLER, AND LOCATION OF EACH DISTILLERY WAREHOUSE IN THE UNITED STATES IN WHICH SPIRITS WERE HELD ON DEPOSIT IN THE FISCAL YEAR ENDED JUNE 30, 1891.

[NOTE.—In column No. 2 the letters indicate transactions during the fiscal year, as follows: "D" indicates that spirits were deposited in the warehouse; "T" that they were withdrawn upon payment of the tax; "S" that they were withdrawn for scientific purposes or for the use of the United States; "E" that they were withdrawn for export; "M" that they were withdrawn for transfer to manufacturing warehouses, and "W" that spirits remained in the warehouse at the close of the year. The name and address stated in columns 1, 4, and 5 are those given by the storekeeper in his reports relative to the distillery warehouse. In column 6 the section of the State in which the warehouse is located is indicated by the letters used to designate points of the compass, except that the letter C indicates the central portion of the State.]

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of spirits (87,176,226 gallons) withdrawn tax-paid from distillery warehouses during the fiscal year ended June 30, 1891, is more than the quantity (83,479,837 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1890, by 3,696,389 gallons, the increase being distributed among the different kinds known to the trade as follows:

		Gallons.
Increase in withdrawals of—		
Rye whisky		39,038
Rum		5,637
Gin		90,379
High wines		412,815
Miscellaneous		6,089,662
Total increase		6,637,531
Decrease in withdrawals of—	Gallons.	
Bourbon whisky	1,398,712	
Alcohol	100,300	
Pure, neutral, or cologne spirits	1,442,130	
Total decrease		2,941,142
Net increase		3,696,389

If the quantity, 1,081,482 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1891, is found to be 88,257,708 gallons, or 3,756,775 gallons more than during the year 1890, including the 1,021,096 gallons reimported and tax-paid during that year.

WITHDRAWAL OF PRODUCTS BY MONTHS.

The quantity of each month's product of spirits in warehouse July 1, 1890, which was withdrawn during the year ended June 30, 1891, is shown in the following statement:

[In taxable gallons.]

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (2,420,256 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse, is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

SPIRITS LOST BY FIRE IN WAREHOUSES FOR LAST NINETEEN YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last nineteen CALENDAR years. As it shows also the stock of spirits in warehouse at the close of each of the *fiscal* years 1872 to 1891, both inclusive, the percentage of loss on the stock held may be readily computed:

NOTE.—The term "taxable gallon," as used in these tables, signifies the gallon subject to tax at 90 cents. In the case of whisky, rum, and gin, this gallon is about equal by measure to the wine gallon of 231 cubic inches, which is the United States standard in measuring liquids. This is also true of most distilled spirits used as beverages, and is owing to the fact that such spirits are mixtures of alcohol and water of about equal parts by volume, a wine gallon of such a mixture being substantially defined by the law to be the taxable gallon. If the liquor is more than half water, the full gallon measure is still a taxable gallon; but if the liquor is more than half alcohol, the taxable gallon does not fill the wine-gallon measure, and if the liquor is all pure alcohol, the taxable gallon fills the measure just half full. For an exact definition of the gallon on which the tax is collected, see sections 3249 and 3251, Revised Statutes, as amended.

1880	31,363,869		

An inspection of the above table shows that the quantity of spirits in distillery warehouses June 30, 1891, is the largest quantity so held at the close of any fiscal year. This stock on hand has grown from 61 millions in 1888 to 68.5 millions in 1889, to 89.7 millions in 1890, and finally to the above quantity, nearly 113 millions, in 1891.

The increase during the last two years was 44.4 millions, but this increment has been twice exceeded, once from 1879 to 1881, when the increase was more than 45.4 millions, and from 1880 to 1882, when it was nearly 58.6 millions.

It appears from reports recently received that while the quantity of spirits in distillery warehouses September 30, 1890, was 85,106,670 gallons, or more than 4.6 millions less than the quantity therein June 30, 1890, the quantity in warehouse September 30, 1891, was 104,810,892 gallons, or more than 8.1 millions less than the quantity so held June 30, 1891. It is noted also that this increased reduction is due to decrease in production during July, August, and September, 1891, rather than to increased tax-paid withdrawals, the qantity withdrawn tax-paid during these three months being nearly 1,000,000 gallons less than the quantity so withdrawn during July, August, and September, 1890.

SPIRITS IN THE HANDS OF WHOLESALE DEALERS AND RECTIFIERS.

[Compiled from reports of collectors based upon statements made to them by dealers and rectifiers.]

It appears from the following table (on pages 164 and 165) that the quantity of spirits, tax or duty paid, held by wholesale liquor dealers and rectifiers October 1, 1891, was 14,406,275 gallons, the quantity so held October 1, 1890, being 16,383,195 gallons. The quantity of domestic and foreign spirits, respectively, and the aggregate held October 1, each year from 1878 to 1891, both inclusive, are as follows:

FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

Under the provisions of sections 42 to 49, inclusive, of the act entitled "An act to reduce revenue and equalize duties on imports, and for other purposes," approved October 1, 1890, provision is made for the fortification with grape brandy, free of tax, of pure sweet wine, and of wine intended for exportation. No limitations are prescribed as to the character of the wines intended for exportation, but certain limitations are specified as to the pure sweet wine evidently designed to avoid the use of the brandy in fortifying wines other than pure sweet wines. The limitations are those requiring that the fortification be done on the winery where the grapes are crushed and the grape juice is expressed and fermented; that there must be no additions to the natural wine of any other substance, and that the addition of the brandy shall be for the preservation of the saccharine matter contained therein. The law also contains limitations to the effect that the wine to be fortified shall not contain less than 4 per cent. of sugar; that the wine spirits added shall not introduce alcohol to exceed 14 per cent., and that the wine shall not contain more than 24 per cent. of alcohol, these percentages of alcohol being computed by volume and on the volumes of the wine after fortification.

The law limits the use of wine spirits or brandy to the months of August to April, inclusive; allows the wine producer who is also a dis-

tiller to use the grape brandy produced by him to fortify his wine, and authorizes the withdrawal of grape brandy from special bonded warehouse to fortify wine.

Authority is given to the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to prescribe bonds, stamps, seals, and necessary regulations.

As the law could not take effect until the regulations were prescribed, and was passed in the midst of the wine season, it was found necessary to adopt certain existing blank forms and stamps to be used until the new forms and stamps could be prepared. It was also found necessary to adopt a method of determining the alcoholic strength of the wine by the use of Ballings's saccharometer, as it was impossible at such short notice to secure and test the needed distilling apparatus, including hydrometers.

The regulations were issued during the month in which the law was passed, and required a seal to be affixed over the bung of each cask of fortified wine.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, was 193,557 tax gallons, all but 2,128 gallons being derived directly from distilleries. The kinds of wine fortified were port, angelica, muscat, sherry, malaga, and tokay, the quantity of fortified wine produced being 1,083,274 gallons.

The quantity of brandy used and of each kind of wine fortified up to April 30, 1891, in each district, is shown in the following table:

For information as to the alcoholic and saccharine strength of these wines, see pages 214 to 217, inclusive.

At the close of the season the regulations governing the fortification of wines were revised so as to embody tables made and decisions rendered from time to time, as necessity required.

The revised regulations also removed the obligation to affix seals, substituting a fortifying room, to be under lock and seal, as a simpler safeguard. These regulations are in force during the present wine season, which commenced August 1, 1891.

The quantity of wine fortified during the months of August and September, 1891, is as follows:

3. Exported and accounted for during the year ended June 30, 1891	3,498,559	298,139,750
4. Remaining unaccounted for at the close of the fiscal year ended June 30, 1891	261,100	10,944,500
Total	3,759,659	309,084,250

It appears upon comparing the figures in the foregoing tables with similar tables published in my report for the fiscal year ended June 30, 1890, that there was an increase in the exportations of 1891 over those of 1890, as to tobacco and cigarettes, and a decrease as to cigars, as follows:

		Increase.	Decrease.
Tobacco	pounds	4,288⅝	
Cigars	number		40,966
Cigarettes	do	35,224,200	

Neither the increase as to tobacco nor the decrease as to cigars is very great, but the increase as to cigarettes is remarkable and brings the quantity exported during the year ended June 30, 1891, up to nearly 300,000,000. The business of exporting cigarettes has grown during the past ten years as follows:

NUMBER DURING FISCAL YEAR ENDED JUNE 30—

1882	64,001,500	1886	134,311,180	1890	259,310,050

WITHDRAWAL OF DISTILLED SPIRITS FROM DISTILLERY WAREHOUSES, FREE OF TAX, FOR USE IN THE MANUFACTURE OF SUGAR FROM SORGHUM.

By the act of Congress making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, approved March 3, 1891, provision is made for the withdrawal of distilled spirits from distillery warehouses, free of tax, to be used solely in the manufacture of sugar from sorghum on the manufacturer's premises.

Regulations pursuant to said act have been issued, but no withdrawal of spirits for the purpose named was made or applied for during the fiscal year 1891.

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1891; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30,1891; also a statement of the quantity of oleomargarine in the United States June 30, 1891, in the hands of manufacturers and wholesale dealers.

Second. A statement of the receipts from all classes of taxes imposed by the oleomargarine law for the year ended June 30, 1891.

Third. A statement by States and Territories and in the aggregate of all persons who paid taxes as manufacturers of and dealers in oleomargarine during the 14 months ended June 30, 1891; also in aggregate of all persons who paid oleomargarine special taxes for the special-tax year ended April 30, 1890.

Fourth. A statement as to the location of oleomargarine manufactories and of wholesale dealers in oleomargarine in April, 1890, and April, 1891, respectively.

Fifth. A statement as to the location of oleomargarine manufactories and of wholesale dealers in oleomargarine in June, 1891.

Sixth. A statement relative to examinations made by collectors and deputy collectors with internal-revenue microscopes during the year.

Seventh. A statement relative to laws of States and Territories concerning oleomargarine.

It appears from the subjoined tables that the average monthly production of oleomargarine under the operations of the law has been as follows:

	Pounds.
During the eight months ended June 30, 1887	2,711,828
During the fiscal year ended June 30, 1888	2,860,460
During the fiscal year ended June 30, 1889	2,972,002
During the fiscal year ended June 30, 1890	2,693,669
During the fiscal year ended June 30, 1891	3,699,367

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	Pounds.
During the eight months ended June 30, 1887	2,592,946
During the fiscal year ended June 30, 1888	2,707,430
During the fiscal year ended June 30, 1889	2,821,970
During the fiscal year ended June 30, 1890	2,566,494
During the fiscal year ended June 30, 1891	3,601,292

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Pounds.
During the eight months ended June 30, 1887	90,566
During the fiscal year ended June 30, 1888	140,516
During the fiscal year ended June 30, 1889	145,746
During the fiscal year ended June 30, 1890	134,866
During the fiscal year ended June 30, 1891	102,426

These figures show an increase from year to year in the production both for consumption at home and abroad, from November 1, 1886, the date the law went into effect, until June 30, 1889; a decrease during

the year ended June 30, 1890; and during the year ended June 30, 1891, an increase of production over any former year, but a decrease for exportation.

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; while the greatest production during the fiscal year ended June 30, 1891, occurred in March, the quantity produced during these months being as follows:

	Pounds.
In March, 1887	3,568,254
In March, 1888	3,940,727
In December, 1888	4,181,317
In October, 1889	4,072,333
In March, 1891	6,723,224

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887:	
May, 1887, produced	1,885,027
June, 1887, produced	1,375,423
During the fiscal year ended June 30, 1888:	
July, 1887, produced	1,208,638
During the fiscal year ended June 30, 1889:	
June, 1889, produced	1,575,362
During the fiscal year ended June 30, 1890:	
July, 1889, produced	1,404,749
August, 1889, produced	1,975,773
May, 1890, produced	1,864,746
June, 1890, produced	1,364,826
During the fiscal year ended June 30, 1891:	
July, 1890, produced	1,723,966
June, 1891, produced	1,988,633

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1891, as well as an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at two cents tax, produced at manufactories during the fiscal year ended June 30, 1891, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1891:

Each special-tax year has heretofore ended April 30. By act of Congress, approved October 1, 1890, each special-tax year was thereafter to commence July 1, and end June 30, following; in other words, the special-tax year was from and after July 1, 1891, to conform to the fiscal year. Hence the months of May and June in the year 1891, only, belong to

no regular special-tax year, and by the act referred to they were constituted a special-tax *period*. The following table is designed to show the situation with regard to the number and location of manufacturers and wholesale dealers in the closing month of that period.

FIELD SERVICE WITH THE INTERNAL-REVENUE MICROSCOPE.

During the year not only was the practice continued by deputy collectors of canvassing the districts with internal-revenue microscopes for the purpose of examining specimens of products exposed for sale as butter, with a view to ascertain whether the substances were really oleomargarine, but an extensive special canvass of this nature was made, induced by the belief of this office that there was more oleomargarine on the market not marked, branded, and stamped as required by law, than had been previously supposed. Although the extent of the work in certain districts fell somewhat short of the expectations of this office, the result on the whole was rather satisfactory. The per cent. of products discovered not marked, branded, and stamped, as required by law, was about eight in every thousand samples examined. This being nearly double the per cent. of last year is confirmatory of the belief above alluded to and fairly illustrative of the improved efficiency in the field service of the use of the microscope. The experience of this office, however, is that there is not so much evasion of the payment of the pound tax on oleomargarine as of the payment of special tax of dealers in the product.

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

	Produced.	Received.
	Pounds.	
On hand November 1, 1886	181,090	
During the fiscal year ended June 30, 1887 (from November 1, 1886)	21,513,537	$723,948.04
During the fiscal year ended June 30, 1888	34,325,527	864,139.88
During the fiscal year ended June 30, 1889	35,664,026	894,247.91
During the fiscal year ended June 30, 1890	32,324,032	786,291.72
During the fiscal year ended June 30, 1891	44,392,409	1,077,924.14
Total	168,400,621	4,346,551.69

It will be seen that the production for the fiscal year, for which this report is submitted, is the largest in the history of oleomargarine operations, exceeding the largest previous production by 8,728,383 pounds; and in receipts exceeding the greatest previous record by $183,676.23. The increase in production over last year was 12,068,377 pounds; in receipts, $291,632.42.

STATE AND TERRITORIAL LAWS RELATIVE TO OLEOMARGARINE.

In last year's report there was published a brief summary of the laws of States and Territories that were in force June 17, 1890 (the date of request of this office for information upon the subject). Through failure to receive advice from Delaware, Georgia, Indiana, Louisiana, Mississippi, South Carolina, Texas, and Washington the summaries of the oleomargarine laws of these States, or remarks concerning the subject, were based upon information received up to and including November, 1888. Information has since been received from the States just named, also from all other States and Territories where changes in the laws have been made since June 17, 1890, which enables this office to make

its summary (herewith presented) complete up to the close of the fiscal year for which this report is submitted, namely, June 30, 1891:

Alabama.—No change in the law as summarized in last year's report.

Arizona.—No change.

Arkansas.—No legislation.

California.—No change.

Colorado.—No change.

Connecticut.—No change.

Delaware.—No change.

Florida.—No change.

Georgia.—An act approved September 21, 1883, prohibits the sale of oleomargarine, except under its true name conspicuously branded upon the package, and also unless the person offering to purchase the article is first informed that it is oleomargarine. In hotels, inns, restaurants, or houses of public entertainment serving oleomargarine, placards must be posted in the dining rooms, and also in the private rooms of the guests, bearing the following words: "This house uses oleomargarine." These words must also appear upon the bills of fare.

Idaho.—No change.

Illinois.—No change.

Indiana.—No change.

Iowa.—No change.

Kansas.—No change.

Kentucky.—No legislation.

Louisiana.—No change.

Maine.—No change.

Maryland.—No change.

Massachusetts.—Section 1, of an act approved March 10, 1891, to take effect the 1st day of September, 1891, reads as follows:

> No person, by himself, or his agents, or servants, shall render, or manufacture, sell, or offer for sale, expose for sale, or have in his possession with intent to sell, any article, product, or compound made wholly or partly out of any fat, oil, or oleaginous substance or compound thereof, not produced from unadulterated milk or cream from the same, which shall be in imitation of yellow butter produced from pure unadulterated milk or cream of the same: *Provided*, That nothing in this act shall be construed to prohibit the manufacture or sale of oleomargarine in a separate and distinct form, and in such manner as will advise the consumer of its real character, free from coloration or ingredient that causes it to look like butter.

An act approved June 11, 1891, to take effect September 1, 1891, imposes penalties upon whoever sells or offers for sale to any person who asks, sends, or inquires for butter, any oleomargarine, butterine, or any substance made in imitation of pure butter.

Section 3 requires a placard bearing the words "Oleomargarine sold here," or "Butter sold here," to be posted in every dwelling, store, office, or public mart where oleomargarine is offered for sale.

Under section 5 it is required where oleomargarine or butterine is served in hotels, restaurants, or any lunch counter, guests or patrons thereof should be notified of the fact.

Michigan.—The law of this State appears to have been supplemented as follows: An act approved April 29, 1891, prohibits the use of oleomargarine, butterine, or any other substitute for butter in any of the public institutions of the State.

Minnesota.—An act of April 21, 1891, to take effect from date of its passage, provides against the sale, or having in possession with intent to sell, any butter substitute that is of any other color than bright pink.

Mississippi.—No change.

Missouri.—No change.

Montana.—No change.

Nebraska.—No change.

Nevada.—No change.

New Hampshire.—Penalty changed from $50 to discretion of court and not to exceed $100. Office not informed as to date of this act.

New Jersey.—No change.

New Mexico.—No change.

New York.—Section 1, chapter 140, of an act approved April 7, 1891, amends section 27 of chapter 183 of the laws of 1885, as added thereto by section 1 of chapter 583 of the laws of 1887, to read as follows:

SECTION 27. No keeper or proprietor of any bakery, hotel, tavern, boarding house, restaurant, saloon, lunch counter, or place of public entertainment, or *of any place where any person or persons, in the employ of the keeper or proprietor thereof, is furnished with board, either without charge or as compensation wholly or in part for his services*, or any person having charge thereof or employed thereat, shall keep, use, or serve therein, either as food for their guests, boarders, patrons, or customers, or for cooking purposes, any article made in violation of the provision of section seven of this act, as amended by chapter five hundred and seventy-seven of the laws of eighteen hundred and eighty-six. This section shall not be so construed as to require evidence of a willful or intentional violation thereof. Whoever violates the provisions of this section shall be guilty of a misdemeanor and punished by a fine of not less than fifty dollars nor more than two hundred dollars, or not less than ten days' or more than thirty days' imprisonment for the first offense and by imprisonment for one year for each subsequent offense.

SECTION 2. This act shall take effect immediately.

North Carolina.—There has been no legislation on the subject of oleomargarine.

North Dakota.—No change.

Ohio.—No change.

Oklahoma.—There has been no legislation on the subject of oleomargarine.

Oregon.—No change.

Pennsylvania.—No change.

Rhode Island.—No change.

South Carolina.—No change.

South Dakota.—This office is still unable to furnish satisfactory information respecting the law of this State.

Tennessee.—No law.

Texas.—No change.

Utah.—No legislation.

Vermont.—By an act approved and in effect November 13, 1890, it is prohibited to sell, expose for sale, or have in possession with intent to sell, any article or compound "made in imitation of butter, and not wholly made from milk or cream and that is of any other color than pink."

Virginia.—No change.

Number 71 of the acts of 1886 hereby repealed.

Washington.—Section 2 of an act approved January 20, 1890, reads as follows:

No person or persons shall sell, supply, or offer for sale or exchange any oleaginous substance, or any compound of the same, other than that produced from wholesome and unadulterated milk or cream of the same, unless the said oleaginous substance and the package containing the same shall be marked so as to plainly establish its true character and distinguish it from pure and genuine dairy products; and in any public dining or eating room where imitation dairy product or products are commonly and knowingly used as an article of food, the bill of fare used in such dining or eating room shall state the fact in the same sized type as is used in printing the body of said bill of fare; or if no bill of fare is used, then in a conspicuous place of said dining or eating room, easily seen by any one entering said room, shall

be posted a notice stating the name or names of such imitation dairy products: *Provided*, That the addition of harmless coloring matter to any product manufactured from pure unadulterated milk, or the cream thereof, shall not come within the provisions of this act; *Provided fuvther*, That milk drawn from cows within fifteen (15) days before and five (5) days after parturition shall be construed to be unclean, impure, and unwholesome.

West Virginia.—Section 1 of an act passed February 11, and approved February 16, 1891, reads as follows:

That from and after the passage of this act it shall be unlawful for any manufacturer or vender of oleomargarine, artificial or adulterated butter, to manufacture or offer for sale within the limits of this State, any oleomargarine, artificial or adulterated butter, whether the same be manufactured within or without the State, unless the same shall be colored pink.

Wisconsin.—An act approved April 6, 1891, to take effect April 11, 1891, date of publication, prohibits the sale of any article having the semblance of butter, which substance is not made wholly from pure milk or cream, salt and harmless coloring matter, except under its true name, to be durably painted, stamped, stenciled, or marked in bold-faced capital letters not less than five-line pica in size upon the packages. With any quantity sold less than the original package there must be delivered with each such quantity a label bearing the true name of the substance.

Section 7 provides that no butter not made wholly and directly from pure milk or cream, salt and harmless coloring matter, shall be used in any of the charitable or penal institutions of the State.

Wyoming.—No legislation.

BOUNTY ON SUGAR.

The act of October 1, 1890 (26 Stat., 567), entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes," provides—

> That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid, from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe.

Congress at the last session made the appropriation necessary to carry out the law according to the recommendations made by this office, based upon the best data obtainable.

The act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1892, and for other purposes (act of March 3, 1891), authorized the Commissioner to employ not to exceed 12 inspectors, at a salary not exceeding $5 per day and necessary expenses, whose duty it should be to inspect sugar upon which a bounty is required to be paid, to aid in ascertaining the amount of bounty due thereon, and to perform such other duties as may be required by the Commissioner of Internal Revenue; and the sum of $36,000 was appropriated for that purpose.

An increase of $165,000 was made in the same act in the appropriations for the salaries and expenses of collectors of internal revenue, deputy collectors and clerks over the estimated amount necessary for collecting internal revenue, for the purpose of carrying out the provisions of the law relative to the bounty.

The clerical force in this office was also increased as follows:

1 head of division, at a salary of	$2,250	1 clerk, at a salary of	$1,000
1 clerk, at a salary of	1,800	1 clerk, at a salary of	900
1 clerk, at a salary of	1,600	1 messenger, at a salary of	840
1 clerk, at a salary of	1,400		
1 clerk, at a salary of	1,200	Total	10,990

The total additional appropriation made for the fiscal year ending June 30, 1892, on account of sugar bounty was, therefore, $211,990.

The act making appropriations to supply deficiencies in the appropriation for the fiscal year ending June 30, 1891, and prior years (act of March 3, 1891), also appropriated $5,000, or so much thereof as may be necessary, for expenses incident to carrying out the provisions of the act of October 1, 1890, relative to the bounty on sugar.

Of this appropriation, the sum of $4,948.67 has been expended—most of it for polariscopes, chemical supplies, and fitting up laboratories.

The sum expended for weighing and sampling instruments, polariscopes, supplies for laboratories, etc., will not be an annual expense except as far as may be necessary to furnish new instruments or apparatus to replace those injured or worn out.

It should be borne in mind that the Government is obliged to have all the sugar weighed by Government weighers, and to throw all the safeguards and checks around the payment of a bounty of $10,000,000 requires the same system that is necessary in the collection of a like amount of taxes.

The same oversight is to be taken of factories where sugar is produced upon which bounty is to be claimed, as is taken in the case of tobacco factories, oleomargarine factories, etc., where revenue is collected.

The bounty will be paid from the Treasury to the individual through the same general channel and surrounded by the same checks as where money is collected from individuals and paid into the Treasury.

WHEN THE ACT TOOK EFFECT.

The first question that arose in making arrangements for carrying out the law was as to the time when the provisions of the act relative to bounty went into effect.

The act itself stated that the provisions thereof, relative to the payment of the bounty, should take effect on the 1st day of April, 1891.

The question was submitted to the Attorney-General whether the bounty was payable on maple sugar made on and after April 1, 1891, and before July 1, 1891. It was decided that it was not intended by Congress to make the bounty payable on sugar produced prior to July 1, 1891.

REGULATIONS RELATIVE TO THE BOUNTY ON SUGAR UNDER THE ACT OF OCTOBER 1, 1890.

The law requires that the sugar-producer, intending to claim bounty, shall file, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and make an application for a license, which notice and application must be accompanied by a bond in such an amount as the Commissioner shall prescribe.

Upon receiving the application and bond, if the same are satisfactory and approved, a license is issued. These are the requirements of the law. All the details as to the supervision of the factories, weighing of the sugar, the payment of the bounty, are matters of regulations to be made by the Commissioner subject to the approval of the Secretary of the Treasury.

The following is a general synopsis of the regulations which have been issued relative to producers of sugar from beets, sorghum, or sugar cane under the provisions of the act:

BOOKS TO BE KEPT BY SUGAR PRODUCERS.

Every licensed producer of sugar from beets, sorghum, or sugar cane is required to provide, at his own expense, a book, in which shall be entered daily the quantity of material used for the production of sugar, the quantity of juice obtained, and its average density, the quantity of sirup purchased and its average density, with name and address of persons from whom purchased, the number of hours the mill was in operation, the quantity of sugar in pounds of each grade produced and

packed, with the number and kind of packages and the serial numbers of the same, the quantity of sugar shipped, sold, or removed for storage, consumption, or sale, and the name of the person to whom shipped, sold, or disposed of.

The sugar producer's book must show by daily entries—

Cane or beets delivered at factory, tons, pounds.
Grown on plantation, tons, pounds.
Purchased, tons, pounds.
Total, tons, pounds.
Number of hours mill was in operation.
Juice obtained and average density.
Gallons of juice; degree, Beaumé or Brix.
Sirup purchased and average density.
Gallons of sirup purchased; degree, Beaumé or Brix.
Cane-producing sirup purchased, acres, tons.
Name and address of persons from whom beets, cane, or sirups were purchased or worked for account of planter.
Sugars produced and packed.
Pounds, net, of firsts, seconds, thirds, and total of all.
Number and kind of packages put up.
Serial numbers of packages, inclusive.
Molasses: Number of barrels. Number of gallons.
Sugars shipped or removed.
The number of packages and number of pounds, net, of firsts, seconds, and thirds, and total of all kinds.
Barrels and gallons of molasses.
Name and address of persons or firms to whom molasses or sugars are shipped or sold.
Route of shipment.

The books of the sugar producer must be kept at the sugar factory and be always open to the inspection of any revenue officer, and when filled up shall be preserved by the sugar producer for a period of not less than two years thereafter, and whenever required shall be produced for the inspection of any revenue officer.

If the sugar producer for his own convenience keeps additional books containing a more extended record of the operations of the factory, they shall also be open to the inspection of the internal-revenue officers in like manner.

MONTHLY RETURNS.

Every producer of sugar from beets, sorghum, or sugar cane is required to make a monthly return, in duplicate, stating the quantity of materials used for the production of sugar, the quantity and kind of sugar produced, the quantity shipped or removed, the serial numbers of the packages and the name and address of the consignee or person to whom the goods were shipped, sold, or disposed of.

The return is to be taken from the sugar producer's books, and is to be rendered to the collector on the first day of each month, or within five days thereafter, verified under oath or affirmation of the sugar producer or the principal manager of the factory.

ANNUAL RETURNS.

An annual return will be required of each producer of sugar from beets, sorghum, or sugar cane at the close of the fiscal year, giving a complete summary of the year's operations, in addition to the regular monthly returns.

DEPUTY COLLECTORS TO ACT AS WEIGHERS.

Collectors of internal revenue will appoint and commission as deputy collectors a sufficient number of suitable persons to weigh sugars. They shall mark the packages with their name, date of weighing, etc., and make reports of each lot of sugar weighed on the day of weighing, in triplicate. One of the copies will be delivered to the sugar producer.

INSPECTORS.

Inspectors will be appointed and assigned to duty by the Commissioner of Internal Revenue. Their duties, which will be performed under the general direction of the Commissioner, will be to inspect sugars upon which a bounty is claimed, and to perform such other duties as may be required.

WEIGHING SUGAR.

All the manual labor connected with and incident to the weighing and inspecting of sugar must be furnished by the sugar producer. When sugars are officially weighed and inspected at the factory the producer must furnish the scales required for such purpose, and the same must be kept to conform to the United States standard. As soon as practicable after being weighed and inspected the packages must be removed from the factory either for shipment or, if intended to be stored, to a warehouse, which shall be subject to the supervision and control of internal-revenue officers.

The sugar will be weighed by weighers stationed at such central places as may be designated by the Commissioner of Internal Revenue or at the place of production by resident weighers, or weighers located in the vicinity.

SAMPLING SUGAR.

The regulations in regard to sampling sugar are based upon the regulations of the Treasury Department for sampling sugars imported under the customs laws previous to the change in the tariff, with such modifications as are required by the circumstances of the case.

TESTING SUGAR BY THE POLARISCOPE.

The regulations relative to the use of the polariscope in testing sugar are based upon the recommendations in a report made to the Commissioner of Internal Revenue by a commission consisting of the chemist of internal revenue, the chief chemist of the Department of Agriculture, and the assistant in charge of weights and measures, Coast and Geodetic Survey. The instrument employed is known as the half-shadow apparatus of Schmidt and Haensch.

All weights, flasks, polariscope tubes, and quartz control plates used in the work of testing sugar by the polariscope will be standardized, and their accuracy tested by the Office of Weights and Measures, U. S. Coast and Geodetic Survey.

SUPERVISION OF SUGAR FACTORIES.

Sugar-producers will be required to permit revenue officers, or other persons who may be authorized to make inspection of the sugar factories, access to any building or place used in connection with the business at all times, and furnish the necessary facilities for making exam-

ination of the premises and taking account of the apparatus, material, and products.

Before a factory commences to operate under the regulations the deputy collector, agent, or officer will proceed to the location of the factory and thoroughly inspect the premises, to see that the factory is correctly described in the notice, and also to ascertain whether any sugar, sirup, molasses, or sugar-producing materials are on hand in the factory; and if any is found, to cause the same to be removed therefrom.

Sugar establishments will be kept under a strict surveillance. They will be frequently visited by the division deputy collector, or other officer assigned to that duty, and the stock and premises carefully examined.

CLAIMS FOR BOUNTY.

Claims for bounty will be made on specified forms, and presented to the collector of internal revenue, accompanied with the certificates of the inspector and of the weigher, for verification. They will be sent by the collector, after certification, to the Commissioner of Internal Revenue, and if allowed by the Commissioner they will be forwarded to the proper accounting officer of the Treasury, taking the usual course of claims upon the Government. After final allowance, drafts upon the Treasury will be issued in payment, which will be mailed or delivered to the persons entitled thereto.

WHO ARE SUGAR-PRODUCERS.

If a planter or farmer sells the cane which he has raised, or the sirup which he has produced, at any period before the manufacture of sugar is completed, he will have no right to the bounty on the completed product. The party purchasing such cane or sirup and making the sugar will be entitled to the bounty upon compliance with the requirements of the regulations.

If, however, the planter or farmer takes his cane or sirup to a sugar factory and has it made into sugar for his own account, retaining ownership and paying to the factory a toll for the manufacture, he is then the sugar-producer and entitled to the bounty.

The central factories which work sirup into sugar, on contract for other parties who produce the sirup and retain ownership, are treated and considered as a part of the sugar factory of the licensed sugar-producer and are subject to the same rules and regulations in regard to notices, books, etc.

† No license issued at date of this report.
‡ Not stated.

The beet-sugar industry in the continental countries of Europe has grown within recent years to great dimensions, so that now the production of beet sugar in the world exceeds that of cane. The improved methods of manufacture and the protective system established in those countries and the payment of bounties to beet-sugar manufacturers on exporting their product have produced this result.

The bounty granted to the manufacturers of sugar under the act of October 1, 1890, the admission free of duty of beet-sugar machinery until July 1, 1892, and the encouragement given by the Department of Agriculture in the experiments for the benefit of farmers, and the aid given by different States will doubtless have the effect of stimulating the industry in this country.

In 1887 we produced in this country from the sugar beet 600,000 pounds of sugar, in 1888 about 4,000,000 pounds, in 1889 about 6,000,000 pounds. In 1890 three factories in this country (two in California and one in Nebraska) produced about 8,000,000 pounds. Three additional factories have been established during the past year, and it is estimated that their production this year will be about 25,000,000 pounds.

SUGAR FROM SORGHUM.

The following is a list of producers of sugar from sorghum cane who have made application for license, with the number of acres planted and estimated production as given in their applications:

* License issued but party proposes to make no sugar for bounty.

Sugar is obtained from sorghum by the same method as from the sugar cane. Its cultivation in this country for sugar-making purposes has been limited.

The quantity of sugar made last year by the applicants for license in Kansas, in which State most of it is made, was 1,132,044 pounds.

The act of March 3, 1891, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, contains the following provision:

> That any manufacturer of sugar from sorghum may remove from distillery warehouses to factories used solely for the manufacture of such sugar from sorghum, distilled spirits in bond free of tax, to be used solely in such manufacture of sugar from sorghum; that all distilled spirits removed as herein authorized shall be of an alcoholic strength of not less than one hundred and sixty per centum proof, and may be removed, stored, and used in the manufacture of sugar from sorghum, and when so used may be recovered by redistillation in the sugar factory of such manufacturer under such bonds, rules, and regulations for the protection of the revenue and the accomplishment of the purposes herein expressed as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

Regulations have been issued by this office governing the withdrawal from distillery warehouses, free of tax, of distilled spirits to be used in the manufacture of sugar from sorghum, pursuant to this provision. The sorghum manufactories have not taken advantage of this provision the present season. The use of alcohol, free of tax, by manufacturers of sugar from sorghum for the purpose of separating the gummy matter from the sorghum juice promises to be of great advantage to this industry. Recent experiments made in this direction by

the Department of Agriculture show that the yield of sugar from sorghum cane will be about doubled by the new process.

MAPLE SUGAR.

A small quantity of sugar will polarize over 90°, estimated at one-twentieth of the production, and probably some will not reach 80° and therefore not be entitled to bounty.

The total annual production in the United States is probably in the neighborhood of 50,000,000 pounds,* but a large majority of producers failed to make application for license the present year.

The above estimate of production was made by the producers early in the season, and is considerably in excess of what may be expected. In making their estimate for the year the producers naturally placed their figures high. It is what they hoped to make if all conditions were favorable. The production in Louisiana last year, which was larger than usual, was 436,056,926 pounds, as reported by applicants for license, and the prevalent opinion is that the coming crop will not be any larger.

The production this year by licensed producers will probably not be in excess of the following estimate:

	Pounds.
Cane sugar:	
Louisiana	450,000,000
Texas	12,000,000
Florida	3,000,000
	465,000,000
Beet sugar	25,000,000
Sorghum	2,000,000
Maple	10,000,000
Total estimated production	502,000,000

Estimating that the beet and sorghum sugar will test 90° or over, by the polariscope, and be entitled to the bounty of 2 cents per pound, and that two-thirds of the cane sugar will test 90° and over, and one-third between 80° and 90°, and that one-twentieth of the maple sugar will test 90° and over and the rest between 80° and 90°, the amount of bounty to be paid for the production of the year ending June 30, 1892, will be as follows:

ESTIMATE OF BOUNTY TO BE PAID.

On cane sugar	$8,912,500
On beet sugar	500,000
On sorghum sugar	40,000
On maple sugar	176,250
Total	$9,628,750

STATE BOUNTIES.

In Kansas the State pays a bounty of three-fourths of a cent a pound on sugar made from beets, sorghum, or other sugar-yielding cane or plants grown in the State; the sugar to polarize at least 90°, the amount having been reduced from 2 cents a pound by a recent act (act of March 4, 1891). The law provides that the expenses of branding the

packages and of making the analysis shall be paid by the persons receiving the bounty. All property of sugar factories is exempt from taxation until 1895.

In Utah the Territorial law (act of March 12, 1890) gives a bounty of 1 cent a pound for the years 1890 and 1891 on sugar made from sorghum, beets, or other sugar-bearing plants grown in Utah; not more than $15,000 to be drawn each year. No bounty shall be paid upon sugar unless the corporation, firm, or person claiming it shall have first erected a plant for its manufacture, costing not less than $200,000, and having a capacity of manufacturing 15 tons of sugar per day.

The claimants for bounty are required to pay the cost of carrying out the law.

The State of Nebraska, by the act of legislature of March 19, 1889, "An act to provide for the encouragement of the manufacture of sugar and paying a bounty therefor," authorized the payment of a bounty of 1 cent per pound upon sugar made from beets, sorghum, or other sugar-yielding cane or plants, but the law was repealed by the legislature of 1891.

RECOMMENDATION AS TO AMENDMENT OF THE LAW.

The law makes no provision for transferring a license, and no provision for issuing a license upon papers filed after the 1st of July of each year.

A case of this kind arose: A firm filed a notice and gave the required bond prior to the 1st of July, and a license was duly issued. Subsequently, after the 1st of July, the firm was dissolved, one member retiring, and a new member took his place. The question arose whether the new firm would be entitled to the bounty upon giving a new notice and filing a new bond. This office held that there was no authority to issue a license to the new firm; that the business must be continued in the name of the old firm and the bounty paid to it; that members of the old firm and the sureties on their bond must sign papers to be filed in this office consenting to this, and continue their liability. Such contracts may be made by the parties between themselves as to indemnity, disposition of the bounty, etc., as they consider necessary for their own protection.

I recommend that the law be amended so as to provide for the transfer of a license or the issuing of a new license to successors or legal representatives, in case of the death of a party who has obtained a license or a change of firm or transfer of business occurring after the 1st of July and after a license has been issued.

CONSUMPTION OF SUGAR IN THE UNITED STATES.

This country is a large consumer of sugar, the people using more per capita than those of any other country, except England.

In the last fiscal year we imported 3,483,477,222 pounds of sugar of the value of $105,728,216, and produced 512,261,530 pounds.

Of the amount imported 661,448,057 pounds were beet sugar of the value of $18,318,269, and 2,822,029,165 pounds cane sugar of the value of $87,409,947.

The amount of sugar produced in the United States is about one eighth of the amount consumed.

CHEMICAL AND MICROSCOPICAL LABORATORY.

From November, 1886, when this laboratory was established under the act of August 2, 1886, "defining butter," etc., to July 1, 1890, there had been a total of 479 samples of various articles received and analyzed, but during the past year 754 samples have been received. This large increase in the number of samples submitted for analysis arises from the free fortification of sweet wines, under the provisions of sections 42 to 49 of the "act to reduce revenue," etc., approved October 1, 1890, which makes it necessary to accurately ascertain the alcoholic and saccharine strength of such wines owing to the limitations prescribed in the law. This act made no provision for an increase in the laboratory force, although the work of a scientific nature called for by several of its provisions, whose enforcement belongs to this office, largely increased the work to be performed in the laboratory here. The consequence is that there is now nearly a year's work on hand.

The following table shows the variety and number of samples received each month, and the variety and number analyzed and on hand awaiting analysis at the end of the fiscal year:

In addition to the samples received from officers of this Bureau, samples have been submitted for investigations and analysis by other Bureaus of this Department.

An investigation was made of the composition of the paper used for bank notes, etc., for a special committee appointed by the Secretary of the Treasury.

The provisions of the act of October 1, 1890, relating to sweet wines, have also added to the work of the laboratory in the preparation of instructions for taking samples of sweet wines for the determination of the alcoholic strength and the sugar contained in such wines. There was also required the calculation of whole per cents tables indicating the number of wine gallons of brandy to be added to sweet wine to produce a given alcoholic strength within the limits prescribed by law.

Regulations for carrying into effect the above sections of the act have also been prepared and have received the approval of the Secretary of the Treasury, and the necessary instruments to be used in testing sweet wines have been purchased in conformity with the law governing such purchases.

As the law (section 43) prescribes Balling's saccharometer as the instrument that may be used to ascertain the saccharine strength of sweet wines after the due evaporation of the contained alcohol, and restoration to original volume, it was deemed advisable as a saving in time and materials to use this instrument not only for the purpose specified in the law, but as a means of approximately determining the alcoholic strength of the wine, by first using the saccharometer as a specific gravity spindle. The method devised by Tabarie for the determination of alcohol in presence of fixed matters with tolerable accuracy could be followed, and one set of instruments and one evaporation suffice for both the alcohol and sugar determinations. Under this method the specific gravity of the original liquid is first observed, a measured quantity is then boiled sufficiently long to volatilize all the alcohol, and the "extract" subsequently made up with water again to the exact original volume, the dilution being made at the same temperature as the original, 60° F. being taken as the standard temperature. Then the specific gravity of the original liquid divided by the specific gravity of the extract is equal to the specific gravity of the alcohol evaporated. From this last figure the proportion of alcohol can be ascertained by reference to suitable tables. When wine is examined by this method the estimation of alcohol has a tendency to be low, but the process is extremely simple and the results approximate closely to the truth. (Allen's Commercial Organic Analysis, second edition, vol. 1, pp. 71–72).

Instead of instructing the officers and furnishing them with copies of elaborate alcohol tables and the corresponding specific gravity for each tenth degree of the internal revenue Balling saccharometer in order to make the calculations called for by the above equation, as they now have to do under the revised regulations, it was considered less complex to instruct them to subtract the reading of the spindle before from that after dealcoholization and refer to a table for the corresponding percentage of absolute alcohol by volume for the difference obtained. This table was calculated by taking some ten to twenty different specific gravities at various points on the saccharometer scales, and, using the above equation, there was obtained the various specific gravities for the alcohol evaporated for a given difference in saccharometer readings. The mean of these calculations was then taken and this result stated in the table. The elaborate tables of W. Schultze, showing the quantity of extract by weight corresponding to each increase of one-tenth in the fourth place of decimals of the specific gravity at 15° C. (59° F.), were employed (Dingler, Polytechnisches Journal, 1878, 230, p. 421), and the alcohol tables of Dr. Thomas Stevenson (London, second edition, 1888).

It was not the intention of this office to allow the gauger or other officer who supervised the fortification to be the sole judge where wines are presented for fortification that approach the limits prescribed by law, but to subject such wines to accurate chemical analysis by skilled chemists. For this reason certain limits were placed in the regulations, and when an officer in the course of his work obtained, by the approximate method given, results approaching these limits, he was to send a sample to this laboratory for careful analysis.

As a matter of fact nearly every fortification that was carried out during the past season in California is represented by one or more samples received in this laboratory.

A large number of the samples of wines have been analyzed by the indirect method prescribed in the regulations and also by the more elaborate and accurate method of weighing on a delicate analytical balance.

The results obtained are stated in the following Table II:

TABLE II.—ANALYSES OF FORTIFIED SWEET WINES. COMPARISON OF DIRECT AND INDIRECT ALCOHOL DETERMINATIONS.

ANGELICA.

Serial number.	Date of fortification.	Direct method.					Indirect method.										Differences between indirect and direct methods.			
		Specific gravity at 15.56° C.	Equal to per cent. extract.	Per cent. alcohol by volume.	Per cent. total solids.	Percent., reducing sugars as glucose.	Temperature noted, original liquid, degrees F.	Reading of instrument.	Corrected reading at 60° F.	Equal to specific gravity at 60° F.	Temperature noted, extract, degrees F.	Reading of instrument.	Corrected reading at 60° F.	Equal to per cent. "sugar."	Difference between readings.	Equal to per cent. alcohol by volume.	Specific gravity, original liquid.	Per cent. "sugar," original liquid.	Per cent. alcohol, by volume.	Per cent. "sugar," or extract.

It will be seen in the summary of the above table the average of the 101 samples analyzed shows an alcoholic content of 1.210 per cent. less by the indirect than by the accurate direct method. When it is considered that this average represents an error of adjustment on the hydrometer spindles not exceeding 4½ millimeters the accuracy of the indirect method is remarkable. The readings of the three hydrometers used in these determinations were first corrected for instrumental errors (according to the data furnished by the Office of Weights and Measures of the U. S. Coast and Geodetic Survey), and the solutions were made up at various temperatures as a counter check on the table of temperature corrections published in the regulations. The difference between the amount of alcohol by volume contained in the distillate and that in the original liquid would be slightly greater than that found by the indirect method, *i. e.*, the method of ignoring the weight of the original liquid and taking the percentage of alcohol to be that found in an equal volume of the distillate gives plus errors, amounting in some cases to as much as 3.5 per cent. All determinations of alcohol, like other liquids, are of necessity made by weight and the percentage by volume found by calculation.

The ascertaining of the specific gravity of a liquid is a method of determining the weight of a certain volume of that liquid compared with the weight of the same volume of a standard liquid, generally distilled water, at a certain standard temperature. (See page CLIV, Report Commissioner Internal Revenue, 1888.) Although section 3249, Revised Statutes, seemingly defines the standard of alcoholic strength in proof spirits as being at the standard temperature of 60° F. (15.56° C.) it makes no mention of the fact that water at its maximum density, 39.2° F. (4° C.), is what the stated volume at 60° F. is compared with. For general convenience the table of alcoholic strength by volume contained in the revised sweet-wine regulations has been calculated with the equal volumes taken at 60° F., and not the volume of alcohol at 60° F. compared with the equal volume of water at 39.2° F.

In Table III will be found tabulated the results of the analyses of all wines received and analyzed in this laboratory during the past fiscal year.

This office not being provided with a physical laboratory for the proper testing of hydrometers and the standardization of weights, flasks, and tubes, arrangement had to be made with the Superintendent of the Coast and Geodetic Survey to have all such work carried out in the physical laboratory connected with the Office of Weights and Measures of his Bureau. It is hardly necessary to say that this class of work involves the greatest accuracy of manipulation and a large amount of time to properly perform the various comparisons at controlled temperatures. For the saccharometers and alcoholometers to be hereafter issued by this office, the necessary correction to be applied for every 2½ per cent. readings of their stems will be furnished by the Coast Survey after direct comparison with the standard solutions and instruments now in their possession. For the manufacturers of these instruments sets of standard ones have been supplied so that it is expected that the hydrometers furnished will be as accurate as it is possible to make such instruments. As soon as the necessary comparisons can be made by the Coast Survey after the instruments are received from the manufacturers, a sufficient stock will be kept on hand in this laboratory, and the unavoidable delays hitherto occasioned in filling requisitions from collectors will, it is hoped, be avoided. The most serious delay has been caused in obtaining a satisfactory model of a portable still for the alcoholic determinations in sweet wines (in accordance with the provisions of the revised regulations), and although one of the largest chemical supply houses in the country has the contract for furnishing the necessary outfits, they have not yet been able to make a still that comes up to the requirements of the specifications.

OLEOMARGARINE.

Of the fifty-one samples received from revenue officers for chemical analysis twenty-six proved to be oleomargarines and the remainder butters. The butters were in most cases exceedingly rancid; some of the officers had evidently considered that rancidity was presumptive of the presence of added fats, overlooking the well known fact that manufactured oleomargarine will keep for a long time without undergoing rancid fermentation, whereas poorly worked butters rapidly decompose, and will even undergo putrefactive fermentation if kept long enough. Samples of oleomargarines have been kept in the laboratory refrigerator for over 2 years without becoming rancid, although at the end of that time they had lost their butter flavor and tasted and smelt like suet fat. These were of the ordinary grades, and retained until they were called for as evidence in trials, and no especial precautions were taken to exclude the air.

An interesting report of the United States consul at Rotterdam has lately been issued by the State Department, showing the vast strides made in the production and consumption of oleomargarine in the Netherlands, oleo oil to the value of $10,000,000 being imported from the United States during the calendar year 1890, and an estimated total output of oleomargarine of 165,000,000 pounds being produced during the same period, of which nearly 128,000,000 pounds were exported to England, Belgium, France, Spain, Portugal, Sweden, Norway, Denmark, and the Dutch, English, and Portuguese colonial possessions. The farmers found that this large output of artificial butter did not interfere in the least with those of them who made a high grade of butter, which commanded good prices the year round, and those who only owned a few cows had no difficulty in making contracts with the oleomargarine fac-

tories to take all the milk their cows would yield. The sale of oleomargarine in Europe, as in this country, was among the poorer classes, who prefer a palatable fat to a rancid one.

MISCELLANEOUS SAMPLES.

Several samples of so-called ciders have been analyzed, which proved on examination to be free from any admixture of the fermented juice of expressed apples, and to consist of varying mixtures of water, tartaric acid, coloring matters, with more or less alcohol, and certain flavoring matters according as peach, cherry, or orange cider was desired to be manufactured. Although a well fermented apple cider contains more alcohol than the strongest ales, its manufacture and sale are not under internal-revenue laws, yet the manufacture of mixtures of alcohol or other distilled spirits flavored or colored to imitate certain alcoholic beverages is subject to tax.

Two samples of a mixture of rock candy and diluted distilled spirits were analyzed, and the manufacturers held to be rectifiers under the law.

Samples of high-colored recently produced distilled spirits continue to be received for analysis. In most cases caramel or other artificial coloring matter is found on examination to be present, arising from such material being introduced into the barrels, presumably before they are filled at the cistern room of the distillery. Of course in the case of rectified goods, where the rectifier is at perfect liberty to introduce what coloring matter or flavoring extracts he pleases, abnormal whiskies may be expected, but they should not be found on distillery premises. The introduction of foreign matter into distilled spirits in which such matter is more or less soluble tends to a greater or less extent to increase the specific gravity of such spirits, and as a consequence the reading of the alcoholometer is below the existing alcoholic contents. This is well exemplified in an exaggerated form in the case of sweet wines (see Tables II and III, *ante*), where there may be as much as 26 per cent. of alcohol by volume in the wine, which the alcoholometer would not only fail to indicate, but would apparently show that there was none at all present. No hydrometer can be made to indicate the composition of three liquids, but is restricted to two, one of which is water, as a general thing, and the other a variable quantity of the substance whose percentage presence has previously been determined by careful analysis, and consequently whose resulting specific gravity is known. Where a third substance is present in a solution it must be eliminated before a hydrometer can be used to indicate the proportions of the other two. In the case of sweet wines, cordials, artificially colored spirits, etc., the evaporation of the liquid in a closed vessel with condensation of the vapors given off on heating readily separates the volatile matters, ethers, alcohols, and water from the non-volatile coloring matters, sugars, mineral salts, etc., and permits of the determination of the alcohol present in the distillate by means of a hydrometer, and by suitable calculation of the amount in the original liquid.

The paper used for printing revenue stamps has frequently been examined and the admixture of wood pulp detected, when present, readily under the microscope by using a moderate power and staining the well macerated paper (previously boiled in dilute caustic alkali solution and washed with dilute acid and water) with potassium iodide, when the characteristic cellular structure of the wood fiber assumes a purplish hue; as such admixture is contrary to the terms of the contract, when

such adulterated paper was found the contract was annulled; the deliveries under the new contract made in consequence of this examination have been so far free from such adulteration.

The first sample received under the provisions of the act "to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," approved October 12, 1888, has been analyzed, and the matter is now in the hands of the United States attorney.

I have the honor to be, very respectfully,

JOHN W. MASON,
Commissioner.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1891 399

L.

Statement of collections, expenses, and percentage cost of collection, for each collection district, during the fiscal year ended June 30, 1891 ..... 400, 401

*For receipts from Alabama, Arkansas, Colorado, Connecticut, Florida, Georgia, Kansas, Louisiana, Maryland, Massachusetts, Minnesota, Montana, Nebraska, New Hampshire, New Mexico, Oregon, South Carolina, and West Virginia, each of which consists of a single district, see pages 246–259.

The District of Columbia and Delaware are now part of the collection district of Maryland; Idaho and Utah, of the district of Montana; Maine and Vermont, of the district of New Hampshire; and Washington and the Territory of Alaska, of the district of Oregon. Wyoming is part of the district of Colorado; Rhode Island, of the district of Connecticut; Dakota, of the district of Nebraska; Mississippi, of the district of Louisiana; Nevada, of the fourth district of California; and Arizona, of the district of New Mexico. Hence the collections of the District of Columbia do not appear separately in Tables A, C, D, and H of the annual reports of this office since the fiscal year 1877, nor the collections of Arizona, Dakota, Idaho, Utah, Washington, and Wyoming since the fiscal year 1884, nor the collections of Delaware, Maine, Mississippi, Nevada, Rhode Island, and Vermont since the fiscal year 1887, but are included in the collections of the districts of which they severally form a part.

NOTE.—By act approved October 1, 1890, the following changes were made in the tax-list: All special taxes relating to tobacco and the special-tax of $500 imposed on manufacturers of oleomargarine commencing business subsequent to June 30 in any year were repealed May 1, 1891; the rate of tax on snuff, chewing and smoking tobacco was reduced from 8 to 6 cents per pound January 1, 1891, and a tax of $10 per pound was imposed on opium manufactured in the United States for smoking purposes, which took effect October 1, 1890.

Note.—The following example is given as an illustration of the use that can be made of Table C in connection with Table E in ascertaining the collections, approximately, for each State and Territory, on spirits, tobacco, fermented liquors, etc., for any year from 1864 to 1891, when such information is desired and a report for that year is not at hand. In the calculation of the percentages, there is always a remainder. Hence in reversing the process and multiplying the per cent. (quotient) by the divisor, the product will not equal the dividend exactly, but it will be so near to it as to answer most practical purposes.

The per cent. of spirits for Illinois in 1885 was .304346. (See p. 246, Rep. 1890.) The total collections on spirits in the United States that year were $67,511,208.63. (See p. 333, Rep. 1890.) $67,511,208.63 × .304346 = $20,546,766.30. The actual collections were $20,546,765.19 (see p. 27, Rep. 1885), showing a difference of only $1.11 between the actual collections and the collections as obtained by calculation.

*** Balance of collections not reported prior to final settlement of the collector's account.**

D.—APPENDIX No. 1, SHOWING THE DIFFERENCES BETWEEN THE INTERNAL-REVENUE COLLECTIONS IN THE DISTRICTS, STATES, TERRITORIES, AND YEARS BELOW NAMED, AS REPORTED BY COLLECTORS AND PUBLISHED IN THE SEVERAL ANNUAL REPORTS OF THE COMMISSIONER, AND THE TRUE COLLECTIONS.

[NOTE.—These differences were mostly discovered at the final settlement of the accounts of such collectors as have retired from office after the reports for the years in which they occurred had been printed. Hence their appearance in this form.

To ascertain the exact amount collected in any one of the following-named districts, States, or Territories prior to July 1, 1890, add to or subtract from, as the case may be, the collections for that district, State, or Territory, in the "total" column in Table D, the sum or sums entered opposite the same district, State, or Territory in this appendix. The result will be the aggregate amount collected.

On pages 350, 351, 352, 353 the signs (+) and (—) are used to denote the amounts to be added and subtracted, respectively.]

*A part of the first proviso of section 59, act of July 20, 1868, reads as follows: "A tax of $4 on each barrel, counting 40 gallons of proof spirits to the barrel, shall be assessed and collected from the owner of any distilled spirits which may be in bonded warehouse at the date of the taking effect of this act, to be paid whenever the same shall be withdrawn from such warehouse." This proviso, in effect, makes the tax 60 cents per gallon on 24,383,951 gallons in warehouse at the time of the passage of that act.

†Section 56 of act approved July 20, 1868, provided that all distilled spirits in bonded warehouse at the time of the passage of that act not withdrawn within 9 months should be forfeited to the United States. The act of April 10, 1869 extended the time of the withdrawal of such spirits to June 30, 1869, but imposed a tax of 1 cent per gallon for each month after April 20, 1869. The receipts on account of this additional tax were $51,695.27.

NOTE.—The act of July 1, 1862, went into operation September 1, 1862. The act of March 3, 1863, provided that the tax on fermented liquors should be 60 cents per barrel from the date of the passage of that act to April 1, 1864. Hence the tax of 60 cents per barrel having expired by limitation April 1, 1864, the tax of $1 per barrel under act of July 1, 1862, was again revived, and this rate, under different acts, has continued in force from and including that date.
